

## Learning Management System

### Learning Management System

A Learning management system is a software application used specifically by students and teachers. Teacher's upload **Readily available content** with them and share with students. It can be installed on small, wireless computing devices, such as smart phones and tablets.

### Eduscoop : Learning Application

Learning mobile software application is specifically used on small, wireless computing devices, such as smart phones and tablets

**For Students:** This is a Platform to enable online learning by the Students. Teacher uploads their own contents & Notes with them and share with students. Mobile Application is more than just another latest technology solution. The students will get individual User ID & Password which is used to login in to Eduscoop for navigating through various teaching materials & assignments.

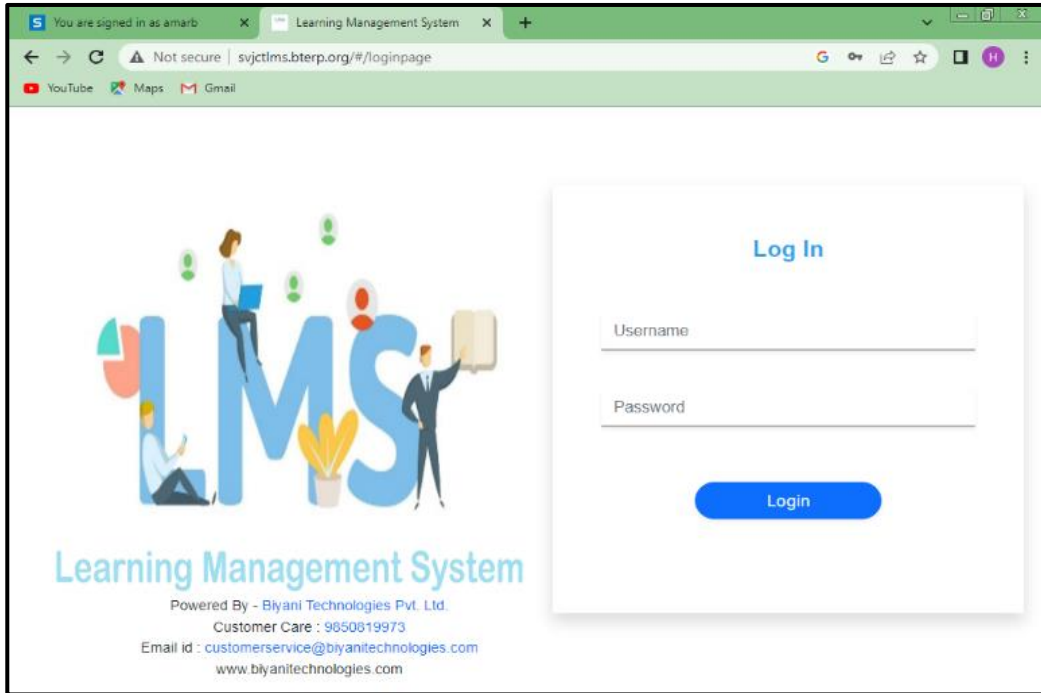

**For Teachers :** The implementation of this Mobile Application helps the Teachers to manage day to day activities more efficiently, promptly and in less time which will lead in time saving.

### Assignments

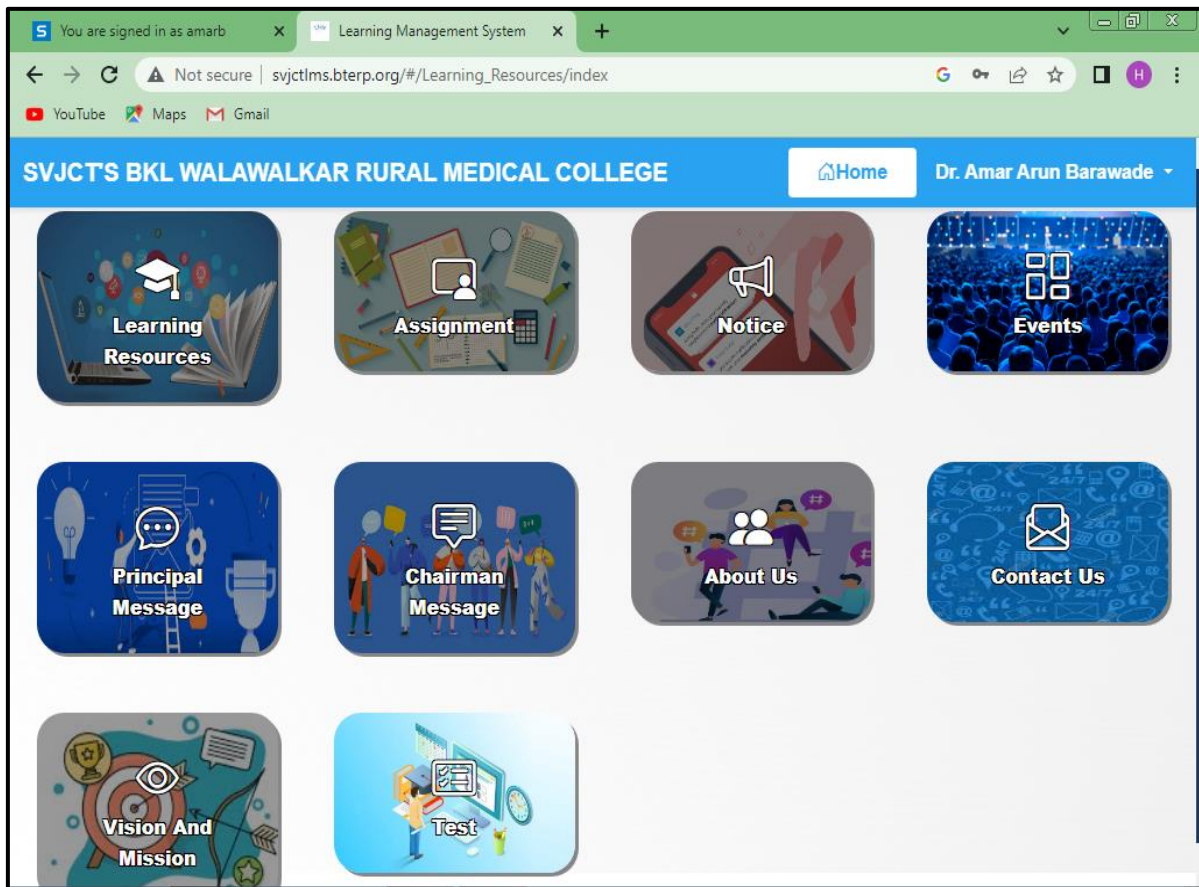

Assignments are given in the form of worksheets which are uploaded in the App. Which Students has to complete within stipulated time.
