CELEBRATING THE BIRTH OF A GIRL CHILD BY GIVING MAHOGANY SAPLING - AN INNOVATIVE INITIATIVE on FEBRUARY 2024

When a girl child is born, it elevates the family to three levels. The birth of a girl makes the atmosphere of the family happy. She takes care of all the elders in the house and health in her adult life and when she gets the support of proper education she raises the family's prestige in the society and therefore the birth of girls should be celebrated and with the aim of getting financial support even when she grows up. The organization has started an innovative initiative of giving a mahogany tree sapling to the mother after the birth of a girl. At B. K. L. Walawalkar Hospital, when a woman gives birth to a girl child, she is given a Mahogany tree and told about the importance of the tree. Furniture made of mahogany wood is considered a symbol of prestige. The Mahogany tree protects the environment. Helps keep air clean, stops soil erosion, regulates air temperature and also does help to maintain good health by keeping insects at bay. Its leaves are also used in medicine. Thus, the mahogany plant celebrates the birth of the girl child and reinforces the position of the girl child as the center of society, with the dual purpose of tree conservation and financial support if needed.
