Dear citizen,

You are welcome to B.K.L. Walawalkar Hospital, diagnostic & Research center , the premier Multispecialty hospital of Maharashtra. BKLWH is committed to provide quality services and medical care to each and every citizen coming to BKLWH. In line with our mandate, we, at BKLWH, strive hard to provide comprehensive, high quality tertiary care services (specialty and super-specialty services) to our users. However, there may be some deficiencies due to extreme patient load and limited resources.

This charter seeks to provide a frame work, which enables our users to know:-

- The services available in this hospital.
- The quality of services they are entitled to
- The means through which complaints regarding denial or poor quality of services will be redressed

Casualty and Emergency Services

- Casualty and Emergency Services Location: - Ground floor, IPD Building, easily accessible from BKLW Hospital. These services are available 24 hours a day, throughout the year.
- Anyone with urgent medical problem can seek consultation/treatment in the Emergency.
- If Doctors decide that you need urgent medical intervention, you will be registered at the Emergency registration counter and proper medical care will be provided promptly.
- Emergency has dedicated team of Senior Residents from major specialties (i.e. Emergency Medicine, Surgery & Pediatrics) and Junior Residents, Nurses, Paramedics and Hospital Attendants etc. to provide urgent medical services.
- We endeavour to provide medical care (incl. Investigation & treatment) at the earliest possible time.
- The treating doctors will call any specialist/super-specialist, who is available on call for urgent consultation as and when required.
- In serious cases treatment/management gets priority over paper work like Registration/Medico- Legal requirements.
- Emergency has fully equipped Operation Theatre for any urgent surgery etc.
- The Emergency is fully equipped with all modern gadgets like monitors, ventilators, nebulizers, defibrillators, central O2 and suction supply etc.
- All urgent investigations like Hemogram, Blood Biochemistry, Urine, Cardiac Biomarker, Blood Gas Analysis, ECG, USG, X-ray, C.T. Scan, etc. are available for Emergency patients round the clock. All medicines and surgical items available in Emergency are provided free of cost.
- Facilities like patient trolleys are available at the entrance of Emergency.
- Public utilities like toilets, waiting area with Tea/Coffee/Snacks, fans, chairs etc. are available.
- All MLC cases are registered at Sawarde Police Station.
- No one is allowed to enter the sterile areas such as operation theaters, critical care units without permission and dress code.
- No one will be allowed to enter the indoor hospital without verification of the identity.
- Administration will not be responsible for valuables and ornament and gadgets with the patients and relatives
- At the time of admission, the patient's relative can collect an IPD pass from the Security Counter and visit the patient during the designated visiting hours: 8:00–8:30 AM, 1:00–2:00 PM, 5:00–5:30 PM, and 8:00–9:00 PM

Out Patient Department (OPD) Services

Location: - OPD services are situated in a separate OPD Building

On 14th June 2024, Dr. Sudeep Gupta, Director – TATA Memorial Centre, inaugurated 'Nuclear Medical Centre' for cancer diagnosis and treatment in a grand ceremony at B. K. L. Walwalakar Hospital and Medical College; Dervan.

The "Nuclear Medicine Centre," which is 6500 square feet in size and features PET and SPECT facilities in addition to high and low doses of nuclide therapy, is being inaugurated today; in a recently built multi-storey structure. Every structure, including walls, floors, and ceilings, etc. are 230 mm, as advised by the AERB, made of substantial reinforced concrete. 6.10 X 7.5 m for SPECT and PET imaging. Size rooms have been built with a separate electrical room, radio pharmacy, dose administration room, waiting area, safe radioactive waste storage system, and separate room for radioactive material storage. Attached labs are also included. Here, the heart's muscle strength is also assessed through a "stress test." A separate room has been set up for patients receiving high dose therapy. According to AERB standards, two 6000-liter tanks are constructed for contaminated miles. The people of Konkan will be benefitted from PET-CT ScanF-18, FDGF-18, PSMAF-18, Cardiac Viability, and SPECT Scan for Renal, Cardiac, Liver, Bone, Thyroid, GE Reflux, Lung Perfusion scan, Iodine therapy for thyroid disorders etc."

Operation Theatres

- The institute has fully equipped modern Operation Theatres, where all kinds of major and minor surgeries are performed using the latest techniques and technology.
- For routine surgeries, the respective departments maintain waiting list. Patients are operated upon as per the OT list. But, in case of emergencies/urgencies, the out of turn surgeries are also performed, at the discretion of the treating doctors.
- The patient should get his Pre-Aesthetic check-up done in PAC Room in OPD Block at surgery OPD no.1 during afternoon before getting admitted for operation and follow the instructions given by the treating Doctors. Laboratory services. Pre anaesthesia fitness is mandatory for all patients undergoing surgery. In case of multiple co morbidities anaesthesia fitness may take extra time.

Shree Swami Samarth Blood Center

BKLWRMC has a licensed modern, state of the art Blood Bank that functions 24 hours a day and provides facilities for blood donation, storage, issue of blood and its components. Strict precautions are taken and testing is done to prevent any borne infection. If your patient requires blood transfusions, then you are requested to arrange healthy blood donors for donating blood in order to reduce shortage of blood.

B. K. L. Walawalkar Rural Medical College & Hospital, was felicitated by the Drugs Inspectors Welfare Association (DIWA) during its Golden Jubilee Celebration held on 30th May 2026 in recognition of her valuable contributions to healthcare and medical education.

A well-equipped Blood Bank began operations from 27th Aug 2000 while the Blood Component Centre became operational in 2010 directly affecting the quality of medical service being offered to more serious patients. Anemia, accidents, Blood loss during delivery of a child can lead to grave danger to the life of the patient & his/her life can be saved using some key components from blood e.g. Red Blood Cells, Platelets, Plasma, Cryoprecipitate etc. This facility has helped save lives of many a serious patient.

We have the following facilities

- W.B (Whole Blood)
- P.R.B.C.(Packed Red Blood Cells)
- F.F.P. (Fresh Frozen Plasma)
- Platelets concentrate,
- Cryo-precipitate

Blood Bank Processing Charges as per SBTC

<i>Name of Component</i>	<i>Processing charges</i>
Whole Human Blood	1450/-
Packed. Red. Cells	1450/-
Platelets	400/-
Fresh Frozen Plasma	400/-
Cryoprecipitate	250/-
Blood Group & Cross Matching	120/-

Standards of Service

- This is a non-profit charitable institution.
- It provides medical care to all patients who come to this institute and trains the medical students and nursing students (both undergraduate and post graduates)
- Standards are influenced by patient load and availability of resources; it is aimed to give all courteous and prompt attention to our users.
- Committed to provide world-class treatment at an affordable rate.

Emergency Services

- The casualty functions round the clock all days.
- Casualty Medical officer and resident Doctors are available 24 hr. s all days
- Duty Doctors are available on call round the clock in all specialties.
- There are 30 beds in the emergency room with critical care beds.
- Trauma team is available 24 hr. s all days which comprises of General Surgeon, Orthopedic surgeon, Anesthetists, Physicians, Blood bank technicians, Radiologist etc.
- Emergency Cases are attended promptly. All the items required are made available during mass casualties.
- In serious cases, priority is given to treatment/ management than paper work like registration and medico-legal cases. The decision rests with the treating doctor.
- Emergency operation theatre is maintained on a regular basis to ensure that it is usable all times.

AMBULANCE SERVICE

- The hospital has an equipped ambulance.

- A team of trained and dedicated medical professionals, Emergency Technicians, Nursing Personnel and trained drivers are always ready to handle all eventualities round the clock.

- Ambulance service enquiry no:

9657510149

- This facility is available 24 hours a day, on all days.

APPOINTMENT HELP DESK

- Appointments for concerned departments are centralized.

- While taking an appointment please quote your Name, concerned department, age, Phone no and MRD, if available and the preference of physician to be seen

- Working Hours – 9.00 am- 5.00 pm (all days.)

- Appointments through phone or by email is to be started soon

ABOUT US

B.K.L. Walawalkar Rural Medical College & Hospital, Diagnostic & Research Centre

Walawalkar Hospital (BKLWH) is a 730 bedded multi-specialty hospital equipped with state-of-the-art equipment providing comprehensive treatment and ultimate care for patients, coming from several part of India. We provide health care facilities for patients from in and around Ratnagiri and nearby districts. We strive to help the needy patients by offering them free treatment with the latest medical facilities.

We strive to provide the best treatment for patients with health issues that belong to all important medical fields such as

- **Medicine, Dermatology, Psychiatry, TB & Chest Disease**
- **General Surgery, ENT, Ophthalmology, Orthopedics, Anesthesia**
- **OBG Pediatrics,**
- **Radio Diagnosis, Pathology (CCL)**
- **ART Center**
- **DRTB Center**
- **Special services**
- **Comprehensive diabetes care unit**
- **Comprehensive Cardiac and CVTS department**
- **Comprehensive Cancer Care Unit**
- **Comprehensive Urology Unit**
- **Comprehensive Gastroenterology Unit**
- **Comprehensive Joint and Spine Unit**
- **Centre for Nuclear Medicine**

Infrastructure

The hospital is 810 beds capacity with 12 operation theatres, Hemodialysis Unit, DR-TB center, All the operation theatres are air-conditioned and include laparoscope, image intensifiers, different types of monitors & ventilators. These operation theatres would handle a range of surgeries including simple procedures for treatment of hernia to complicated ones like that for knee replacement, spine surgeries, and Cancer surgeries.

Intensive care units are available for patients who have undergone complicated surgeries, new- born babies etc. Hemodialysis units are also available considering the need for the same for patients in serious condition. 11 units from Baxter are used for this purpose. For ensuring water purity in dialysis treatment, various water purification techniques like RO System etc. are used. All wards in the hospital are connected to each other by computers. This enables the doctors to view any report in any ward & administer treatment accordingly. Availability of internet helps in obtaining views of doctors from abroad in the treatment of some patients. Arrangements in the hospital which provide clean fresh air and light along with cleanliness have always impressed the patients.

General Facilities

- Central Services for In/Out patients well equipped OT Theatres
- Emergency Medicine department EEG / ECG
- Central Sterile Supplies Department (CSSD)
- Central Laboratory
- Blood Bank Component Lab
- Ultra-modern Radiology Department
- Hemodialysis
- Central Laundry
- Central Kitchen
- Canteen
- Pharmacy
- Central Photography Section
- Central Workshop
- Electronic Data Processing - Networking and Local Intranet
- Mortuary
- Fleet of Vehicles for transporting patients, students, trainees and staff available.

Department of Medicine

- ECG, EEG
- Hemodialysis- 11 Machines with RO
- Ventilators, High flow ventilator
- Bedsides CVVHD unit
- Philips cath lab and DSA system
- IABP (Intra-aortic balloon pulsations) machine
- Holter System
- ABG Machines
- Activated Clotting Time Machine
- Pacemakers
- Echo with Doppler's
- Continuous Glucose Monitoring
- Tanita Body Composition Unit
- Neurothesiometers

Comprehensive Diabetes Treatment Unit

Continuous glucose monitoring (CGM) Devices help you manage Type 1 or Type 2 Diabetes with fewer finger stick tests. A sensor just under your skin measures your glucose levels 24 hours a day. A transmitter sends results to a wearable device.

Haemodialysis Unit

- 11 Dialysis Units
- CVVHD UNIT
- RO Plant
- Trained Staff & Technician
- Emergency Facilities Available

Department of Comprehensive Cardiac and CVTS

In Comprehensive cardiac care center, Walawalkar hospital, a well-equipped advanced Cardiac Theatre facility has been started from 9th June 2018. It has state of art facilities like

- Angioplasties
- Angiographies
- Pacemakers
- Bypass surgery
- Valve replacement
- Holter Monitoring (With One Day Stay)
- 24 Hours ECG monitoring
- Color Doppler
- Treadmill Test

- ISO 5 Modular O. T. Epoxy floor, aluminum silicate ceiling to prevent fungus, Stainless Steel walls to maintain temperature and sterility.
- Air handling unit to minimize infection.
- Trans oesophageal Echo to diagnose ASD, VSD, PDA and closure.
- All surgical equipment's are German made. OT lights are of Simon's with each dome having 16 flowers and total 48 LED lights to prevent heat generation.
- Team of full-time cardiologist. Radio feathers, Cath lab, Technicians and cardiac nurses in campus.

Dr. Rajeev C. Godbole, Cardiothoracic Surgeon

Department of Asthma, T.B., Pulmonology

Acute respiratory distress syndromes, acute bronchial asthma, Interstitial lung disease, pulmonary Koch's pleural effusion, Bronchitis pneumonia etc. cases are treated in I.C.U. for artificial ventilation. I.C.U. is equipped with adult as well as paediatric ventilator.

Special Treatment for Snake-bites, Scorpion-sting and Leptospirosis

The incidence of Snake-bites & Scorpion-sting is much higher in Konkan than the cities. Most of the times, such patients lose their life when treated with some local “medicine” or by so called “sorcerer”. Based on the research carried out at the Walawalkar hospital, it has developed special treatment for these incidents.

A snake-bite affects blood-coagulation leading to kidney failure hence a treatment is developed using anti-snake venom along with blood-plasma. This cheap and effective treatment has saved lives of many a patient. A scorpion-sting affects the functioning of heart causing danger to the life of the patient. The hospital has also developed a cure for it and saved a number of lives. In Konkan region, the farmers growing rice do the sowing in rainy season while standing in mud in the field. These conditions coupled with rats can cause Leptospirosis even the

first to identify the bacteria causing Leptospirosis. The identification made preventive care easier, saving the lives of scores of farmers of today & tomorrow. ICMR Andaman and CMC Vellore are helping out in this research work.

Comprehensive Gastroenterology Unit

An endoscopy is a test to look inside your body. A long, thin tube with a small camera inside, called an endoscope, is passed into your body through a natural opening such as your mouth. Your GP may refer you for an endoscopy if you're having certain symptoms. It will usually be done at an endoscopy unit in a hospital.

An endoscopic procedure allows the doctor or nurse to visually inspect your gastrointestinal tract using a video camera attached to the end of a long thin flexible tube or endoscope. Upper gastrointestinal endoscopy also known as OGD or gastroscopy is examination of the esophagus (food pipe or gullet), stomach and duodenum (first part of the small bowel). Lower gastrointestinal endoscopy colonoscopy (or flexi sig) is an examination of the colon (large bowel). Please see patient information leaflet for specific endoscopic procedures.

PROCEDURES:

- Gastroscopy
- Colonoscopy
- ERCP – Stent Placement & Stone Removal
- Polypectomy & Endoscopic Resection Procedures
- Foreign Body Removal
- H. Pylori Biopsy
- Esophageal Dilatation
- Banding / Sclerotherapy
- CBD Exploration
- Duodenal Perforation Surgery
- Advanced Endoscopic GI Procedures

Antiretroviral Therapy Center

Clinical Care

- Baseline check-ups, regular clinical evaluation, and ARV dispensing
- Standard screening and free medicine kits for co-infections
- Seamless tracking and transfer of complex cases to Centres of Excellence

Support Services

- **Adherence Counselling:** Mandatory sessions on strict daily pill-taking and side-effect management
- Care Coordinator assisting patients to apply for state pension and food schemes
- Free condom distribution and guidance on safe sexual health practices

Infrastructure

- **Dedicated space:** Consultation and counseling rooms to maintain strict confidentiality
- A full team of Medical Officers, Nurses, Counsellors, and Data Managers

DRTB Center

Diagnostic Facilities

- Designated Microscopy Center equipped with **LED Microscope** and **Fluorescent Microscope**
- **CBNAAT Site** – Daily **12–16 CBNAAT tests** for TB on different samples received from 4 TUs in the catchment area
- **HIV Testing** in TB patients through **PPP ICTC**
- **X-ray, CT/MRI, FNAC, and Biopsy** facilities available (case-to-case basis)
- **TB Culture** – Samples transported to the designated government laboratory for **liquid/solid culture** and **LPA for drug resistance testing**

Treatment Services

- Initiation of **DS-TB Treatment**
- **TB Preventive Therapy** for contacts
- **Counselling and Nutritional Support / Nikshay Mitra**

Comprehensive Cancer Care Unit

All types of cancer patients are treated at B.K.L Walawalkar Hospital. Onco surgeries and chemotherapy is available for the cancer patients. Full time specialists of the hospital and a team of doctors from the Tata Memorial Cancer Hospital treat the cancer patients. Oral malignancy, CA Breast & CA cervix, lymphomas, leukemia, CA colon, CA rectum, etc cases are treated under various financial aid schemes.

Collaboration with Tata Memorial Centre

Metronomic Chemo Therapy- A Ray of Hope

A deadly disease like Cancer can be fought with the application of knowledge and persistent efforts. Walawalkar Hospital is dedicated to the treatment of Cancer with all its resources and knowledge. The incidence of Cancer is very high in the Konkan region owing to addiction to tobacco and/or liquor and lack of knowledge. With the objective of eradication of Cancer from the Konkan region, the hospital is also engaged in creating awareness about the disease in all possible ways. The Department of Atomic Energy (DAE) donated BHABHATRON II Unit, High Dose Rate Brachytherapy, CT Simulator, and a top-of-the-line Planning System in 2009. The treatment is very cheap, easily available, non-invasive, has less side effects and supportive care, offers good patient compliance, and is as effective as costly chemotherapy. The hospital has also been awarded the "Americare Award" for its dedicated efforts in cancer care.

High density Radiation, Brachytherapy, CT Simulation for planning (Since 2010)

Over the last 14 years, the B.K.L. Walawalkar Hospital has been providing good quality secondary care services. It is backed up with tertiary level medical care and has expanded its scope very rapidly since its inception. In recent time, the institute has set up the Radiotherapy unit which will result in establishment of comprehensive cancer care facilities in the backward Konkan region of Maharashtra. Padmavibhushan Dr. Anil Kakodkar, Chairman Department of Atomic Energy inaugurated Radiotherapy unit "BHABHATRON-2" on 7th February 2009. This unit is under control of AERB the renowned Cancer specialist, Dr. Shreepad Banavali (Tata Cancer Hospital) has invented the Metronomic Chemo-Therapy and has thus offered hope to the Cancer patients.

Dormitory for Cancer Patients

Dormitory is available for poor patients free of cost. The majority of patients coming to Hospital for surgery or post-surgical treatment (radiotherapy, chemotherapy, etc.) need a place to stay while undergoing treatment. Anyone who has had to look for accommodation in this rural area knows what an impossible task it can be. And these people are poor, often illiterate, and ill. BKLW Hospital attempts to fill each family's needs.

Tobacco and Alcohol de-addiction Awareness Session

Union Minister Nadda inaugurates Tobacco Cessation Centre (TCC) at B. K.L.Walawalkar Rural Medical College & Hospital, Sawarde, Union Minister of Health and Family Welfare JP Nadda virtually inaugurated the Tobacco Cessation Centre (TCC) at BKLWRMC here in an initiative of the Centre towards achieving a tobacco-free society. Speaking at the event 24.09.2024, Union Minister Nadda highlighted that this initiative underscores the Government of India's commitment to public health under the leadership of Prime Minister Narendra Modi. "The Department of Psychiatry deserved kudos for spearheading this important initiative. The need for expanding such services in collaboration with other departments in the future will ensure holistic management of patients," Dr. Suvarna Patil, Medical Director of BKLWRMC, Sawarde, tobacco cessation. He stressed that the centre will provide a comprehensive approach, integrating pharmacological and psychosocial support to aid patients in overcoming tobacco dependence. The fully functional TCC will be managed by trained psychiatrists and offer specialized treatments for both smoked and chewable forms of tobacco through medications and counselling. Given the widespread use of tobacco in India and its association with numerous medical conditions, the TCC at BKLWRMC, Sawarde is envisioned as a one-stop centre providing multidisciplinary care and support for individuals looking to quit tobacco. Tobacco use, both in smoked and chewable forms, continues to be a leading cause of preventable illness and death worldwide. The launch of the Tobacco Cessation Centre at BKLWRMC, Sawarde, provides individuals struggling with tobacco dependence access to expert care and guidance. Through a combination of medications, counselling, and psychosocial interventions, the TCC aims to support users in overcoming their addiction, thus paving the way for a healthier, tobacco-free future.

Department of Surgery

The hot and humid weather of Konkan coupled with shortage of potable water and high content of minerals in water lead to an increased incidence of kidney-stone among the population. Further these kidney-stones if not treated in time can even damage the kidneys. The hospital established the Urosurgery dept. to treat the poor population of Konkan and especially the youth on whose shoulders there is always a large responsibility. Specialist doctors & state-of-the-art treatment has led to quick recovery for patients. Patients are brought to the hospital from nearby villages & sonography is conducted for free leading to early detection of kidney stones. For appropriate treatment end urology is taken help For conducting a surgery with endoscope (minimally invasive), a range of equipment such as Cystoscopy, Uteroscopy, Nephroscope, Image Intensifier etc. has been made available. These facilities being available at nominal costs, it has saved the lives of a number of young men.

Plastic and Re Constructive Surgery

- Cleft Lip/Palate & Plastic Surgery,
- Orthodontist, Burn Contracture,
- Facio-maxillary surgeries-Rhinoplasty,
- Maxilla, Mandible fractures, Trauma NTE

Before

After

Before

After

Department of Orthopedic

Konkan is synonymous with winding roads & “ghats” (roads with bends which are difficult to negotiate). In addition to these challenges are incidents like falling from a tree, injuries due to carrying large load on head etc. These challenges & incidents mean that the farmers in this area some time are incapacitated for life owing to some or the other accident. But the hospital has prevented this from happening thanks to the specialist doctors in its orthopedic department. This department has a separate, well equipped operation theatre with Image Intensifier etc. and all types of joint and spine surgeries are performed.

A range of different surgeries are carried out like knee replacement, hip replacement along with special procedures like Balloon Kyphoplasty for collapsed vertebra etc. This work has been accepted widely by the patients and now patients from cities are coming to the hospital to benefit from this specialized service at fraction of a cost.

Orthopedics Services:

- Hip & Knee Arthroplasty
- Open Spine Surgeries
- Minimally Invasive Spine Surgeries
- Shoulder & Knee Arthroscopic surgeries
- Ligament repair & Re Construction Surgeries
- All Type of Simple & Compound Traumatic Fractures
- All types of internal & external Fixation of trauma / Fractures
- Pelvic Fractures Fixation
- Vertebroplasty & Kyphoplasty
- Root block for Pain Management
- Rotate Cuff repair & reconstruction surgery

Department of Physiotherapy

Physiotherapy is a valuable adjunct to the Medical Management of Orthopedic, Onco patients and Chest patients alike. While physiotherapy offers supportive treatment to critically ill patients, it is essential for rehabilitation once the patient is stable. Almost all Indoor patients are offered post-operative treatment for at least 3-4 days and rehab for non-operated cases up to discharge. All patients are counseled about home care and continuation of treatment to maintain good health. In the OPD –

Arthritis, trauma and operated orthopedic patients come regularly on OPD basis. Shoulder and ACL rehabilitation programme for operated and conservatively managed patients is given regularly.

- The spacious physiotherapy department is a gateway to the path of better health and fitness.
- The department is managed by a team of highly qualified skill and experienced physiotherapists.
- State of art of rehabilitation equipment including Treadmill, cycle, ergo meter, Multistation gym, Staircase and Ramp

Neuro-physiotherapy : focuses on treatment of individuals with neurological conditions such as spinal cord injury etc.

Cardiorespiratory Physiotherapy: aims to help clear lung secretions, prevent or improve areas of lung collapse & rescue the effort of breathing.

Community Physiotherapy: aims at promotion of health & rehabilitation in elderly, Women, Differently abled individuals & Occupational Health. we give treatment using exercise Therapy & Electrotherapy. We use different electrotherapeutic Modalities for pain relief

- 1) TENS (Transcutaneous electrical Stimulation)
- 2) Interferential Current Therapy
- 3) Short Waves Diathermy
- 4) Ultrasound Therapy
- 5) Infrared & ultraviolet radiations
- 6) Paraffin Wax Bath Therapy

Department of Neurosurgery

A neurosurgeon is a physician who specializes in the diagnosis and surgical treatment of disorders of the central and peripheral nervous system.

- Hematoma
- Extra Dural
- Sub Dural
- Trauma
- Brain tumors
- Astrocytoma
- Meningioma
- Pituitary adenoma
- Cranio- pharyngioma

Department of Neurology

- Epilepsy and Seizure Disorders
- Stroke and Cerebrovascular Accidents
- Multiple Sclerosis
- Parkinsonism and Movement Disorders
- Neuromuscular Disorders
- Neurodegenerative Disorders
- Spinal Cord Disorders
- Infections of the Nervous System
- Interventional Neurological Procedures

Comprehensive Urology Unit

- Percutaneous Nephrolithotomy(PCNL)
- Ureteroscopic lithotripsy (URSL)
- Cystolithotripsy
- DJ stenting
- Visual Internal Urethrotomy (VIU)
- Transurethral Resection Of The Prostate(TURP)
- Cystoscopy
- Nephrectomy
- Prostatectomy

Department of Ophthalmology

The Ophthalmology department has its own ecosystem of supporting facilities. Housed in an independent building, in addition to an OPD section it boasts of separate arrangements for conducting surgeries.

Incidents of Cataract lead to problems with vision and coupled with old age medical conditions adversely affect the life of poor people even leading to accidents in daily life.

This is countered by offering Cataract-surgery with the help of phaco-unit at very low rates. Cataract surgeries for Yellow and Orange ration holder patients are free of cost. During surgery period, lodging-and- boarding arrangements for the patients are done by the hospital free of cost. A Phaco surgery costs is nominal.

Our Eye Bank is committed to facilitating eye donation and supporting corneal transplantation to restore vision. Through ethical collection, preservation, and distribution of donated corneas, we strive to bring hope to patients with corneal blindness. We encourage everyone to pledge their eyes and help give the priceless gift of sight to those in need.

Ophthalmology Equipment / Machines

- Phacoemulsification Machine (Phaco Machine)
- Retinal Cryotherapy Machine (Retina Cryo Machine)
- Slit Lamp Bio Microscope
- Ophthalmic Laser Machine with Foot Pedal
- Optical Coherence Tomography (OCT) Machine
- Auto Refractometer (Auto refractometer)
- Non-Contact Tonometer (NCT)
- Automated Perimeter (Perimetry Machine)
- Green YAG Laser Machine

Available Eye Tests & Procedures

- Optical Coherence Tomography (OCT)
- Visual Field Test (Perimetry)
- YAG Laser Procedure
- A-Scan Biometry
- Visual Acuity Test
- Slit Lamp Examination
- Auto Refraction Test
- Colour Vision Test
- Fundus Examination (Retinal Examination)

Department ENT (Ear, Nose, Throat)

Tonsillectomy, OTOENDOSCOPE, Nasal Endoscopy, OAE Test Septoplasty, Stapedectomy, Tympanoplasty, etc. operations are routinely performed. Audiometry is also done routinely on O.P.D. basis. Hearing Aid is provided free of cost to Yellow & Orange ration card holders

SLEEP LAB

Sleep Apnea: Meaning & Symptoms

OSA (Obstructive Sleep Apnea): Airway blockage during sleep due to relaxation of throat muscles, causing breathing difficulty.

CSA (Central Sleep Apnea): Brain temporarily stops sending signals to breathing muscles during sleep.

Causes of CSA: Brainstem disorders, stroke, neck spine conditions, severe obesity, and narcotic painkillers.

Symptoms: Excessive daytime sleepiness, insomnia, and frequent awakenings.

Department of Paediatric

Full time pediatricians are working in the department. Neonatal I.C.U. is of 15 beds. Intrauterine growth retardation low birth weight babies acute respiratory distress, continental duodenal Artesia imperforated arms etc. cases are treated.

Pediatric Surgery :

Congenital duodenal atresia, congenital diaphragmatic hernia, imperforated anus, congenital hernia, hydrocele, etc. cases are operated successfully.

NICU/PICU:

The hospital has a separate ward for treatment of children up to 12 years of age. Children born with challenges due to complications at the time of delivery, children born before 9 months, children born with less weight than normal, children born with congenital defects, with jaundice etc., all are treated in a well-equipped Neo-natal Intensive Care Unit (N.I.C.U.) This section boasts of state-of-the-art equipment such as ventilator, phototherapy with LED, Syringe Pump, Central Monitoring, Warmer, Electric Weight Machines, Central Suction & Oxygen, Double Volume Exchange Transfusion etc.

Malnutrition Elimination Programme & Child Health (Since 2001)

With the aim of countering this problem in the vicinity of Ratnagiri & Sindhudurg Districts, children below 6 years of age & Antenatal & post natal mothers in the area are approached. Specially created teams from the Hospital/Trust imparted this group, information on Health & Healthy-Diet. >100 Anganwadis are adopted for this purpose and these teams visit these anganwadis weekly basis.

Target groups-0-6 age group children / Adolescent girls / Post natal mothers For the target group, parameters like Hemoglobin, Height, weight, serum proteins were monitored periodically & Nutritious food (in the form of "Ladoo", prepared by the Hospital/Trust) was supplied to them on weekly basis. This project has created a positive impact on the beneficiaries.

- **Registration of Child & ANC Mothers:** Children below 6 years of age, Antenatal & Lactating mothers
- **Physical Examination & Investigations:** Height, Weight, Mid Arm, Head & Chest Circumference
- **Nutritious Ladoos Supply:** Daily supply of packets of nutritious ladoos
- **Medicine Supply:** Hematinics, Vit.D, Vit.A, Calcium, Anthelmintics & Hospital Visit on Monthly Basis
- **Patho Investigations:** Hb%, Serum Proteins, Urine, MT - Every 3 Monthly
- Referral services to B.K.L. Walawalkar Hospital, Free 1st Hospital
- Delivery & subsequent two deliveries at subsidized rates Post Natal Baby Care
- Well-equipped N.I.C.U. Walawalkar Sudama Yojana.

Walawalkar Ladoo Gopal Yojana (0-6 Years)

Malnutrition in Konkan is a social disease, which can easily be treated with proper nutrition. Geographically located in mountainous terrain with poor soil quality, Konkan has extreme hot & humid weather on top of already low poverty levels. This has led to widespread nutrition issues amongst the

population. To build a strong, positive & capable society, it was necessary to break this vicious cycle of malnutrition. And with this objective, the hospital decided to increase awareness of nutrition and developed a 'Ladoo' (a nutritious delicacy prepared from nuts, honey, dry dates, saffron, milk powder, Jaggery, local whole grains and some natural herbs such as 'Ashwagandha', 'Shatavari', 'pimpli', 'sunth', 'ahliv' etc.). They contain 5% Iron, 84% Calcium, 68% Carbohydrates & 10% Proteins and other vitamins.

As described earlier, these ladoos are distributed every week to ICDS centres (preschools), pregnant women & adolescent girls for free in all villages. Each person receives 2-3 ladoos for each day. These ladoos provide the daily nutrients required to this population, which struggles even for one decent meal of the day, and to track the effects of this nutritious supplement, the weight & height of the recipients is measured regularly. Furthermore, women are also trained on how to prepare a range of healthy food at home from easily available local ingredients in their regions. Until now, almost 617 pre-schools (approx. 21240 children) from the 3 districts of Ratnagiri, Sindhudurg and Satara, have received this service.

Regular consumption of these ladoos has shown remarkable improvements in Hemoglobin content in the blood & weight of the children/women. Such positive changes in pregnant women always help in delivering a healthier child. A report from the Maharashtra State Public Health Laboratory has indicated that this "Ladoo" contains about 410 Kcal energy per 100 grams, which proves its importance. The hospital has been distributing these "Ladoos" to the malnourished population since the year 2000 and has continuously worked towards its goal of improving the overall health of the whole society

Walawalkar Sukanya Yojana (Adolescent Girls)

- One day work shop
- 10 days residential camps
- school visits for work shops
- Village visits

Anemia is still one of India's major public health problems, especially among adolescent girls. It has become necessary to find out correlates of nutritional status of adolescent girls in rural area. Community based cross-sectional study - Nutritional status of study subjects is assessed on the basis of BMI. The health check-up camps is organized to know the deformities among the girls and at the same time counseling is done to make them aware of good health.

Walawalkar Dant Chikitsa Yojana

B.K.L. Walawalkar Hospital have been supporting initiatives like free dental check-up camps in rural areas and the efforts set the stage for major improvements in oral health care among school children. All zilla parishad schools from Ratnagiri district are selected for dental check-up.

Dental caries is a major public health problem among schoolchildren in rural areas. They are the main cause of tooth mortality, presentation of dental emergencies and tooth extraction in this group. The many causes of dental caries include poor dietary habits, poor oral hygiene and lack of dental care. Methods to combat this problem include dissemination of dental health messages, promotion of good personal dental care and regular dental check-ups.

The general prevalence rate of positively detected cases of any level of dental caries was 93%. (Poor 59% + Fair 34%) and only 7% found in good condition. The proper treatment and awareness done by hospital throughout the year resulted into reduced caries incidences upto 90% among screened students.

Department of Gynaecology

- Routine OPD for Obstetrics & Gynecology
- Normal & cesarean Delivery
- Infertility treatment
- IVF center
- lap and open hysterectomy
- Cancer Screening for Uterus / Ovary/ Cervix
- Pap smear Test
- Colposcopy
- PICU / NICU

Walawalkar Yashoda Yojana- Baby Shower program for pregnant women

Walawalkar Maher Yojana

Free 24 hours Ambulance

Early marriages, multiple pregnancies, poverty, alcoholic husbands, insufficient food, and heavy physical labour on the farm/home lead to malnourishment in most women within the Konkan

region. To strengthen the roots of society, the hospital decided to concentrate on the health of pregnant women. A team of doctors & nurses was formed, well-equipped with medicines and 'nutritious laddoos'; these teams visit the villages, treat the poor & malnourished pregnant women right at their doorstep to ensure safe, healthy delivery and post-recovery. The villagers believe that delivery of a pregnant woman is a natural event and there is no need of a hospital for this purpose. Also, the remote places of Konkan are so isolated that they are usually delayed by the time they reach the hospital. The hospital initiated a 'Maher scheme' (Maher means the parental home) to resolve this issue. The expectant mother is brought to the hospital 7-8 days before the delivery and this period is utilised to train her on how to take care of a new-born, treatment & bath, health, clothing and the baby's diet. After delivery, she is discharged with a gift basket, which includes a variety of items required for the new-born. These schemes are introduced with expectations that the women would feel comfortable giving birth at the hospital and are introduced to proper ways of taking care of their new-borns once they return home.

Facilities for High risk Mother

- **Free normal delivery as well as lacs** and maternity services for patients belonging to the Below Poverty Line (BPL) category.
- Comprehensive care and support to pregnant women, particularly those with high-risk pregnancies and those from economically weaker sections.
- Free medical treatment, including Iron Sucrose injections for anemia management, essential medications, and routine laboratory investigations.
- High-risk mothers are provided with complete bed rest, close monitoring, and specialized care throughout their stay.
- Free nutritious meals for both the patient and one accompanying relative.
- Free ambulance transportation for admission and referral purposes.
- Nutritional supplements, including specially prepared laddoos, to promote maternal and fetal well-being.
- Aims to improve maternal health outcomes by providing accessible, affordable, and quality healthcare services.

Department of Psychiatry

In order to assess the developmental and psychological health of persons, different psychological tests like Developmental Screening Test, I.Q. Test, E.Q. Test, Clinical Test, Aptitude & Attitude Test and related equipment's are utilized at the Hospital.

These Tests are conducted relatively at much cheaper rates as compared to the rates prevailing in Pune- Mumbai. There is a full time working psychiatrist at the hospital and treats patients having Schizophrenia, Anxiety, depression and other psychiatric problems.

OPD Services

- Psychiatric Consultation & Treatment
- Medication Management
- Psychological Assessment
- Individual & Family Counseling
- Cognitive Behavioral Therapy (CBT)
- Child & Adolescent Mental Health Services
- De-addiction & Tobacco Cessation
- Stress Management & Follow-up Care

IPD Services

- 24×7 Inpatient Psychiatric Care
- Medication & Clinical Monitoring
- Electroconvulsive Therapy (ECT)
- Individual & Group Psychotherapy
- CBT & Behavior Therapy
- De-addiction & Detoxification
- Rehabilitation & Occupational Therapy
- Family Counseling & Discharge Follow-up

Department of Dermatology

- **PRP Therapy** – Treatment to reduce hair fall and help hair growth.
- **Electrocautery** – Removal of skin warts and unwanted skin growths.
- **Skin Biopsy** – Taking a small sample of skin for testing and proper diagnosis.
- **Chemical Peeling** – Treatment for dark spots, pimples, acne marks, and uneven skin.
- **Derma roller Treatment** – Treatment for acne scars, pits, and facial skin marks.
- **Intralesional Steroid Injection** – Injections given for patchy hair loss and certain skin conditions.

Department of Radiology

Accident victims, Cancer patients and those suffering from paralysis can be treated at the hospital with Spiral CT Scan. To make available those facilities which are not easily available in the vicinity is the philosophy behind creating this infrastructure and has thus rendered it to be perceived as an “oasis” for the patients.

If the CT Scan photographs indicate any “tumor” in any part of the body then biopsy can be carried out. Interventional Radiology can help in removing parts of “tumor” from lungs, chest, stomach; neck etc. and the same can then be used for diagnosis. Similarly Digital X-ray with image distribution software can offer tremendously improved results for the x-ray image. A special scheme is implemented using Ultrasonography to detect & treat any medical anomaly in a patient before it leads to complications. Accordingly, sonography is conducted for free for poor patients after getting them to the hospital in an ambulance. This has helped in timely detection and treatment for kidney-stone, problems related to uterus & some tumors etc. Doppler equipment helps in checking the blood flow and gangrene can be prevented. The hospital thus offers medical treatment aided by modern technology. Mammography helps to detect breast cancer at very early stage.

Facilities in Radiology

- Linear Accelerator, MRI (Philips 1.5T), CT Scan,
- **MRI Preparation:**
For Abdomen, Pelvis & MRCP: Take laxatives on the previous night and come on an empty stomach with 12 hours of fasting. For Plain Head, Spine & Joints: No preparation is required. For all contrast studies: 4 hours of fasting is required.
- Ultra Sonography, Mammography,
- High density Radiation- Brachy-therapy,
- Barium Screening, Interventional Radiology
- Comfort one 2- a unique noise reduction technology available for a widerange of applications. By reducing acoustic noise to near ambient, it willhelp promote patient comfort and acceptance.

WHOLE BODY Whole Body MRI Scan		
Category	MRI Scan Details	Charges
Brain	Routine, Stroke Protocol, CSF Flow Study, Orbit, Pituitary	Rs. 3125
Spine	Cervical, Dorsal, Lumbar, SI Joints, Sacrum Coccyx	Rs. 3750
Neck	Neck / Face / Tongue, Salivary Glands with Sialography, Chest	Rs. 3750
Joints	Shoulder, Elbow, Wrist, Hip, Knee, Ankle, TM Joints	Rs. 5000
Abdomen & Pelvis	Abdomen	Rs. 6875
Abdomen & Pelvis	Pelvis, MRCP/Liver, Tumor Protocol, Multiphase	Rs. 5000
Angiography /Venography	Brain + Neck, Renal, Ilio-Femoral, Lower/Upper Limb, Aorta	Rs. 5000
Special	Brachial Plexus, Lumbar Plexus, Urography, Neurography, Defecography, Metastasis Screening	Rs. 4000

Department of Pathology

The Pathology dept. is divided into Hematology, Biochemistry, Histopathology, Cytology, Serology, and Microbiology.

JCCL Hematology, Biochemistry, Cytology, Microbiology, PCR Similar to the deductions made from a human pulse, blood tests also reflect the health of the patient and hence the hospital has decided to strengthen this part of medical treatment.

Sr. No.	Test	Cost
1	CA 125	625/-
2	CA 19.9	1700/-
3	CEA	850/-
4	PSA	625/-
5	B-HCG	750/-
6	Procalcitonine	1500/-
7	VITAMIN B12	725/-
8	VITAMIN D TOTAL	1875/-

Tests related to liver, kidney, blood-sugar is carried out using fully automated analyzers which produce instant reports. Hormones & tumor marker tests are carried out using a high-end machine called Chemimmunoassay. Histopathology dept. helps in correct diagnosis about tumors in the body about whether they are due to Cancer and this way has saved lives of scores of patients.

Correct identification of bacteria leads to correct treatment. Acknowledging this, the hospital has well equipped micro-biology dept. with Elisa Reader, Washer, and Laminar Airflow etc. Research about diseases like Dengue, Malaria and Leptospirosis is carried out using this equipment.

Not only these facilities are offered at fraction of a cost but the results of these tests are available in 2-3 hours which can help in immediate treatment of the patient and which would ultimately lead to increased possibility of success in treatment.

Collection of Specimens

* All Days 08.00 am to 6.00 pm

*Reliability and promptness of laboratory results is ensured as tests are done by automatic machines.

*Reports are made available within the shortest possible time, which will be specified.

Advanced Equipment's in Pathology Department & CCL

Biochemistry Instruments

- Fully Automated Analyzer
- Chemiimmunoassay
- Cell Counters
- Immunohistochemistry

Gas Chromatography-Mass Spectrometry : (GC-MS)

FT-IR (Infrared spectroscopy)

Microbiology Equipment's

Polymerase Chain Reaction (PCR)

Biosafety Cabinet Class II A 2

BACTEC 9050 System

Research Microscopes

Virology Research & Diagnostic Laboratory (VRDL) & RT-PCR Lab

NABL Accredited

The laboratory has been established as per ICMR guidelines and accredited by National Accreditation Board for Testing & Calibration Laboratories (NABL), a Constituent Board of Quality Council of India. The laboratory is well equipped with advanced equipment with cutting-edge technology such as Real Time PCR machine, Biosafety cabinets class IIA2, -80°C deep freezer, -20°C deep freezer, Cold centrifuge etc. The Roche Company's RT PCR

Machine "The Light Cycler® 96" is fully automated. Results are specific, generated automatically as compared to other company's machines (where graphs are analyzed and results have to be interpreted manually) and with no false positivity in it.

Sr. No.	Test	Cost
1	Covid-19 Antigen Detection Test	250/-
2	Covid-19/ SARS Cov 2- RT PCR	750/-
3	RESPIRATORY Panel by Real time PCR	2200/-
4	Dengue, Chikungunya, Zika Multiplex PCR	1200/-
5	Leptospira RTPCR (Qualitative)	1000/-

Pharmacy

- Central pharmacy located in the hospital premises and functions 24×7.
- All medicines and surgical instruments are available and sold at MRP without taxation.
- Free tuberculosis medicines are provided by the hospital for the entire course.
- Documented policy and procedure SOP for 24×7 pharmacy services.
- Well-staffed in-patient department, outpatient department, and minimal number of sub-stores for emergency medicines.

Campus Ambience

While aiming to provide state-of-the-art medical services at the doorstep of the people of Konkan, the organization recognizes that in addition to the well-equipped hospital, it also needs specialist doctors. These doctors are offered accommodation within the premises of the hospital. To dispel doubts about availability of clean water, electricity & good education for children, the organization has provided for continuous availability of purified water and electricity (with generator back-up) and also runs an English Medium School in the vicinity of the hospital. Services of plumber, carpenter are provided on-call basis and cooking gas has been made available. These facilities mean that the doctors can save time in following up on these things and instead can completely concentrate on healing the patients while leading a stress free life.

In hospital premises there is a garden and a sports complex (with arrangements for certain games & exercises) which also contribute to a stress-free & healthy lifestyle. The organization runs a general store to make available items of daily need at reasonable rates for the employees & patients. Apart from doctors, housing assistance is also provided for nurses, technicians, clerks etc.

Other Facilities

DURING YOUR STAY

- We hope this information helps you to prepare for your stay as an inpatient at BKLWH.
- A skilled team of personnel some of the working behind the scenes will hopefully make your stay comfortable and pleasant

CATEGORY OF ACCOMMODATION.

- A/C Single Room: This is an individual air-Conditioned room with attached washroom. The Room provides sofa set and an attendant couch.
- Non A/C Single Room: This is an individual room with attached washroom, telephone and an attendant couch.
- General Ward- The general ward features separate male ward, female ward of all departments, Pediatric Ward and Psychiatry Ward.

PAYMENTS

- An advance payment has to be done at the time of admission; Final settlement of accounts will be requested when patient is to be discharged.
- Payments can be made at the billing department round the clock. The hospital accepts payments in Cash and through demand drafts. Please note that the hospital does not accept cheques at the time of discharge.
- Daily or alternate day bills are generated and send to the patient/bystander
- Charges for various tests and procedures are available at the Financial Information Counter (MSW). For poor patients, the Medical Director along with the in charge of Patient Service Department can waive off the charges.

CASHLESS TRANSACTIONS (CLAIMS)

- We entertain cashless transactions and for this BKLWH have got tie up with institutions such as KRCL, ECHS, RGPPL, MSEB and some of the insurance companies. MSW desk is placed at main counter ground floor.
- Our computerized billing system will consolidate all charges for medicines/consumables/services availed by you during hospitalization.

MEDICINES & CONSUMABLES:

- Medicines and surgical consumables required for the treatment can be procured from the in-house pharmacy. A central pharmacy is located in the hospital premises which functions 24*7. There are small pharmacies working in different departments for the convenience of patients.

BODY PROFILE

- B.K.L. Walawalkar Hospital has developed special health checkup programs (Total body profile) that consist of detailed medical assessment and counseling on health awareness. Each package has been designed to study the functioning of all the vital organs in our body for any symptoms of major illness and also pinpoint potential areas of risk so as to prevent future health problems.

OTHER SERVICES & FACILITIES:

- Wheel Chairs and stretchers are available on request at any point from Patient Movement Service Department.
- Lifts are available for access to higher floors in each floor.
- There is a stand-by generator to cater to emergency services in case of breakdown of electricity.
- Bank of India's ATM center is available at hospital premises.
- Adequate drinking water and toilet facilities are available.
- Hospital provides linen to wear for all admitted patients. In case of any difficulty you may contact the sister incharge of the floor.

GENERAL INFORMATION

- **Medico legal cases:**

On admission of a medico legal case, the hospital has to mandatorily honor the rules of the Indian Govt and informs the local police authorities.

- **Death Certificate:**

If a patient expires in the hospital, a death certificate is issued to the family by the hospital to carry the body. The hospital sends the Death registration form & Medical Certificate of cause of death to the local government authority Grampanchayat. The family has to collect the final Death Certificate from the Grampanchayat office.

- **Mortuary Services**

Mortuary provides Refrigerated storage of deceased patients.

- **Birth certificate**

Parents of the newborn will be issued birth certificates from the hospital as soon as they fill up the Birth report form for registration.

PATIENT SERVICES DEPARTMENT (MSW)

- Free/ Subsidies treatment facility is provided for patients according to their financial status.

FOOD SERVICES

- **Canteen**

The canteen is open to visitors daily as well as for Staff from 7:00 a.m. to 10:00 p.m. The canteen is located at nearby premises of the hospital.

- **Patient Relative Room**

BKLWH provides with separate room for relatives of patients where they can cook the food. It is a temporary lodging facility for relatives of inpatients. It is located nearby premises of the hospital.

General Instructions

No Smoking:

- BKLWH is a “No smoking zone”. Patients and their attendants are strictly prohibited from smoking in the hospital premises.

Silence:

- Silence is essential in a hospital. Even minor noises can disturb people who are not feeling well, Visitors are requested to speak softly and avoid unnecessary noise. Attendants are advised to keep down the volume of mobile ringtone. Patient’s relatives are advised not to crowd the area out-side the patient rooms. Hospital staffs under instruction to take necessary steps to prevent noise and crowding.

Responsibilities of the User

- The success of this charter depends on the support we receive from our users.
- Please try to appreciate the various constraints under which the hospital is functioning. On an average, 1400 plus patients attend the OPD daily & more than 80 patients visit Casualty daily.
- Please follow the rules and regulations of the hospital while inside the hospital campus.
- Please do not cause inconvenience to other patients by crowding or making noise unnecessarily.

- Please help us in keeping the hospital and its surroundings neat and clean.
- Please don't argue with security guards, show your passes when asked for & help maintain the order and peace inside the hospital premises.
- Please use the facilities of this hospital with care and do not damage/ spoil hospital property
- Beware of Touts & unauthorized persons. Don't indulge in any money transactions with them
- The Hospital is a No Smoking Zone.
- Please refrain from demanding undue favors" from the staff and officials.
- Please provide useful feedback and constructive suggestions. These may be addressed to the Medical Superintendent of the Hospital.
